PERSONAL PROFILE

I am a passionate software developer based in Johannesburg, South Africa, with a strong interest in building web, mobile, and game applications. I am a graduate of ALX Software Engineering and IT Varsity Full Stack Development, and I hold an Oracle Java Certification. My technical stack includes .NET, Java, Laravel, JavaScript, Linux, and Git. I have practical experience applying software development principles such as MVC and clean architecture to design, build, and maintain applications that are efficient, scalable, and user-friendly. Through various projects and experience, I have strengthened my skills in creating and consuming RESTful APIs, implementing authentication, and developing interactive user interfaces.

Beyond coding, I enjoy exploring emerging technologies, gaming and music. I thrive in collaborative environments, value continuous learning, and am motivated to contribute meaningfully to dynamic teams while growing my expertise in the tech industry.

EDUCATION

ALX Africa	**Jan 2025**

Software Engineering Certificate

Digital Youth ICT	**Nov 2024**

Oracle Certified Associate, Java SE 8 Programmer

Phomolong Secondary	**Dec 2014**

High School, Matric

IT Varsity	**Jul 2025**

Certificate in Full Stack Development

PROFESSIONAL EXPERIENCE

CodSoft, Remote	**Dec 2024 - Jan 2025**

Intern Software Developer

- Contributed to various coding projects, maintaining a GitHub repository to showcase skills.
- Collaborated with team members to improve coding practices and problem-solving approaches.
- Utilized object-oriented programming concepts like encapsulation and abstraction to create a clean and maintainable codebase.
- Implemented input validation and logical checks to ensure system accuracy and reliability.

Ecoosty, Hybrid	**Mar 2025 – Aug 2025**

Software Developer

- Contributed to new Implementation of Laravel Livewire authentication flows with backend password reset logic.
- Migrated legacy UI components to a fully responsive, utility-first design system while maintaining controller functionality.
- Developed and maintained form-based features with server validation and Livewire real-time handling.
- Improved user experience in password reset and login workflow issues between Livewire and Laravel controllers.
- Ensured cross-device compatibility and clean, maintainable fullstack code.
- Collaborated in a component-driven development workflow, adhering to modern Laravel practices.

PROJECTS & EXTRACURRICULAR

Movie E-Recommendation   Dec 2024 – Present

- A full-stack web application offering personalized movie recommendations based on user preferences.
- Tech Stack: React, Node.js, Express.js, MongoDB, JWT, TMDb API
- Developed user authentication, recommendation systems, and interactive movie browsing.
- Integrated API routes to handle backend data and connected it seamlessly to the frontend.

OneKeyBags   Jun 2024 - Present

- An e-commerce platform enabling travelers to quickly access essential items, reducing last-minute stress.
- Tech Stack: HTML, CSS, JavaScript, Node.js, Express.js, MongoDB, Netlify,
- Developed a responsive and intuitive UI for seamless shopping.
- Built secure user authentication and order management features.
- Implemented backend APIs for product listings, cart, and checkout.
- Integrated MongoDB for dynamic product and user data storage.

SKILLS

Programming languages: Java, JavaScript, C#, PHP

Web Development: HTML, CSS, React, RESTful APIs, ASP.Net, Alpinejs, Apache, TailwindCSS, UI/UX Principles

Version Control & Collaboration: Git, GitHub, Asana, Trello, Azure Devops

Technical Skills & Frameworks: JWT, Linux, Bash scripting, Object-Oriented Programming (OOP), Debugging, SDLC, Caching(Redis), Unit Testing (Jest, Mocha) .Net Core, Nodejs, Laravel, XAMPP

Data Visualization: Infogram, Excel, MySQL, SQL Server, MongoDB, Microsoft 365

Languages: English, Tsonga, Zulu, Sepedi and Xhosa

Driver's License: C1
